

## Corporate Overview

The Metal Building Group has been servicing the construction industry offering pre-engineered metal building solutions since 1981. With experienced and dedicated people supporting a team approach, the Metal Building Group has grown to become a leading “design build” metal building contractor.

Our highly innovative people strive to match the owners needs with a construction solution. This means we investigate all engineering options to identify the most efficient structure to provide the best building value. Best value offers enhanced design and more building for any particular budget.

Our customers receive, service, quality, and value in every phase of their construction process. We do this with reliable, responsive, and resourceful people in the office and out in the field. This allows us to deliver quality projects, products and workmanship to our customers in a professional and effective manner on time and within budget.

### *Home Hardware - Golden, B.C.*

The Metal Building Group has also completed Home Hardware buildings in Vernon BC, Creston BC, Fort St. John BC, and Cranbrook BC.

### *New Afton Mine - Kamloops, B.C.*

Size: 121' Wide x 462' Long x 95' Eave Height  
 Weight: 1,200 tons of steel  
 Conditions: Winter Work

## About Metal Building Group

- In-house CAD drafting, design assistance and proprietary engineering program for pre-engineered building systems.
- A strong 23 year association with VP Buildings Inc., a major metal building manufacturer producing approximately 6,000 buildings per year.
- Over 30 years as a metal building contractor and substantial experience working as a team “Design Build” construction.
- Experienced and knowledgeable management personnel in our office providing more than 200 years combined experience in the construction industry.
- Twenty-five person in-house erection crew and senior field foreman.
- In-house miscellaneous metal and structural steel fabrication.

## Location and Facilities

Operating from our head office in Langley, British Columbia, the Metal Building Group has completed projects throughout Western Canada, Central Canada, the Yukon, and the Northwest Territories. We ship our pre-engineered steel buildings from any one of six VP manufacturing centres strategically located from coast to coast. We complement our pre-engineered metal building business with a 5,000 square foot conventional steel fabrication shop which stocks commonly needed components and fabricates various miscellaneous metals and structural steel structures needed for our projects. A large yard also provides us with outdoor material and equipment storage. Our facility allows us to manage, maintain and repair our fleet of equipment and organize our crews for safety, training and management purposes. Our facility is a unique capability that sets us apart from most of our major competitors.

## Quality Control & Assurance

The Metal Building Group understands the stringent requirements for commercial and industrial projects. Our quality management program can handle the large amount of information and coordination required for these projects. Our QC/QA includes a comprehensive Inspection and Test Plan covering design, procurement, supply and installation. Regular inspections, checklists, reporting and logbooks are required through all phases of the construction process to eliminate error and ensure our customers receive the highest possible quality.

## Construction, Craftsmanship, & Safety

The Metal Building Group's in-house erection crew has grown to consist of more than twenty-five experienced field personnel, including a safety coordinator, senior and junior foremen, trade ticketed journeyman ironworkers, CWB Certified welders, and a certified mechanic. Due to the "in-house" nature of our crews, the Metal Building Group can maintain in-depth control over all field resources at a senior level allowing us to ensure schedule and other commitments to our customers.

***“The ability to mobilize our own crews where needed, when needed, ensures responsive customer service and projects that are built on time.”***

The Metal Building Group strongly believes in promoting a corporate culture with values that include teamwork, trust, fairness and recognition so that our people are energized to do work that is rewarding and that they are proud of. By bringing this philosophy to all of our projects we feel that our clients are being best served. We are able to attract and retain people that perform quality work because good management, training, and safety are the foundations of our company.

The Metal Building Group is a member of the Metal Building Contractors and Erectors Association and

actively participates in the Metal Buildings Institute's Quality and Craftsmanship Training Program which provides national standardized testing for all our erectors on twelve modules covering the following:

- Train-the-trainer
- Tools of the trade
- Framing
- Unloading, Material Handling, & Staging
- Windows & Doors
- Fiberglass Insulation
- Wall sheeting Installation
- Exposed Fastener Lap Seam roofs
- Standing Seam Roofs
- Roof Penetrations and Curbs
- Flashing, Trim, and Gutters
- Internal Gutters and Transitions

All our employees receive a certificate of completion for each module and upon successful completion of all modules are then recognized as MBI Quality Assured Craftsman. All of our field personnel have or are in the process of receiving this MBI Quality Assured Craftsman certification. In addition to the Quality Craftsmanship training program all field personnel undergo extensive on the job training for quality control and safety.

**Metal Building Contractor and Erectors Association**

*Our mission is to support the professional advancement of our metal building contractors, erectors and our industry.*

**“Quality Is Never An Accident”**

*Metal Buildings Institute*

When it comes down to performing the work onsite, safety is paramount, and that is why we have one of the most comprehensive safety programs adhering to the highest safety standards in the industry today. We have achieved the stringent COR Safety Certification recognized in BC, Alberta and Saskatchewan and our program is administered by a full-time Safety Officer. When you select us for your project, you can count on a safe construction site in addition to a quality building and good value.

The Metal Building Group delivers added value, safety and performance to its customers through a strategic focus on the growth and maintenance of a modern equipment fleet. Including countless small tools, welders, generators, etc. the Metal Building Group owns twelve late model heavy duty service and pick-up trucks, four jobsite cargo trailers, three flat deck tandem axle trailers, and the following aerial / lifting equipment.

**IN-HOUSE AERIAL / LIFTING EQUIPMENT**

Quantity	Equipment Type	Make	Model
2	18 and 30 Ton RT Cranes	Grove	RT 4x4 Crane
2	10,000 lb 55ft Telehandler	JLG Gradall	G10-55A 4x4 Telehandler
1	9,000 lb 43ft Telehandler	JLG Gradall	G9-43A 4x4 Telehandler
3	80' Boomlifts	Various	Various
4	60' Boomlifts	Various	Various
2	45' Boomlifts	Genie	Z45 & S45 4X4
5	30'+ Sissorlifts	MEC & Skyjack	Various
3	Electric Sissorlifts	JLG & Condor	Various

Our people have the experience and skills to build quality metal buildings for any industry or application, large or small. We have dedicated and professional design and management personnel, reliable and skilled in-house fabrication and erection crews, a large fleet of modern trucks, heavy equipment and tools. We work closely with our customers to safely bring their projects to successful conclusion on time and within budget.
